

Expert questionnaire how to satisfy Pedestrian Quality Needs PQN by telematics and other types of Intelligent Transportation Systems, ITS

This questionnaire supports the work in the PQN COST358 project, WG1 (C5, K5 and M5) and WG2 (M5) and also the HUMANIST post-doc grant about ITS and vulnerable road users.

1 Why do people walk? What does make walking easy and attractive:

2 a What ITS measures would improve the pedestrians situation most? Please describe at least one solution you can think of.

2 b What practical solutions are there? Please include important references!

2 c Can you comment on ITS concerning traffic safety for **children** travelling to/from school?

2 d Can you comment on ITS concerning traffic safety and mobility for **senior citizens**?

3 Please list some important future research questions!

Questions about you who have answered the questionnaire:

Gender: Female Male

Profession : _____ Country: _____

Year of birth: _____ Email: _____

Please feel free to send additional information to Lars.Leden@vtt.fi

Thank you for answering our questions!
