

A nighttime photograph of a city skyline with illuminated buildings and a prominent tower. In the foreground, a road or bridge is shown with long, curved light trails from traffic, creating a sense of motion and urban connectivity.

**Access and Mobility for
the Cities of Tomorrow**

**4TH INTERNATIONAL CONFERENCE
ON FUTURE URBAN TRANSPORT**

APRIL 19-21 2009 GÖTEBORG SWEDEN

**4TH INTERNATIONAL CONFERENCE
ON FUTURE URBAN TRANSPORT**

Access and Mobility for the Cities of Tomorrow

Urban transport faces unprecedented challenges. Urbanisation, climate change and resource constraints are causing major changes. Increased demand for mobility and accessibility calls for a transformation of existing transport systems.

Join decisionmakers and experts from industry, cities and academia in the search for sustainable urban transport systems. This conference provides a unique forum for bringing policy, practice and research closer together. The programme is designed to maximize interaction between participants and discussion on the themes presented.

KEY THEMES

Business and city leaders will present their thoughts on the need for a transformation of urban transport. A series of scientific state-of-the-art presentations will contribute to furthering understanding regarding accessibility, mobility and transportation solutions for the future.

- **Future directions for the city**
- **Delivering sustainable urban transport solutions**
- **Time, space and the need for access**
- **Social integration and economic development**
- **Financing and organisation of urban transport**

KEY SPEAKERS INCLUDE

Zhang Jianfei, Mayor of Changsha, China

Kulveer Ranger, Director for Transport Policy,
Greater London Authority

Leif Johansson, President of AB Volvo and CEO
of the Volvo Group

André Navarri, President, Bombardier Transportation

Lisa Schweitzer, Professor, University of Southern California
